## WORK EXPERIENCE

---

### NetGlobal Solutions, Inc.

May 2026 – Present

Frontend Developer

- Develop and enhance responsive web applications, building reusable UI components and features while ensuring consistent user experience across devices.
- Integrate REST APIs and backend services, implementing reliable data handling and improving application performance, responsiveness, and overall usability.
- Troubleshoot and resolve frontend issues, collaborating with cross-functional teams, and maintaining clean, scalable code to support efficient feature development and product improvements.

### Sandlot Technology Ventures

June 2024 – February 2026

Junior Frontend Engineer

- Engineered cross-platform applications for Android, iOS, and web, delivering multiple production releases and supporting hundreds of active users while ensuring responsive and consistent UI across devices.
- Integrated REST APIs and optimized performance, reducing page load times and improving application responsiveness, which led to smoother user experience and fewer reported issues from users and stakeholders.
- Resolved critical bugs and collaborated with cross-functional teams, helping maintain stable releases and faster development cycles, while improving code quality and maintainability across projects.

## PROJECTS

---

### Mr. & Mrs. (2026) - Personal Project

Currently developing a digital wedding invitation platform with customizable invitation creation, responsive previews, RSVP management, and interactive design features. Improving the platform's navigation, performance, and overall user experience.

### CEO Dashboard (2026)

Develop a centralized management dashboard to track company projects, providing a single interface for project visibility, progress monitoring, and administrative workflows.

### PCAB Dashboard (2026)

Enhanced the dashboard UI and implemented API integrations to support dynamic data retrieval and improve overall functionality.

### HoldTones (2025 - 2026)

Contributed to the development of HoldTones, a mobile messaging app that enables users to earn from phone calls through integrated advertisements, focusing on feature development and API integration.

### St. Luke's MDPF (2025)

Maintained and enhanced the MD Portal Mobile platform by fixing bugs, ensuring accurate data retrieval from the SLB database, and improving interface functionality. Worked on web service methods to support reliable information display and precise computations for doctors' professional details.

### Asexual Community Eden - A.C.E. (2025)

Developed Asexual Community Eden (A.C.E.), a niche social and dating platform designed for the asexual and (a)romantic community. Focused on fostering meaningful connections, inclusivity, and support, the platform enables users to build friendships, find understanding, and engage without the pressure of sexual or romantic expectations.

### Aboitiz Infra Capital Customer Portal (2024-2025)

Developed a customer portal for Aboitiz Infra Capital, enabling clients to track and manage transactions such as billing, payment history, and service requests. Integrated detailed reporting, real-time updates, and streamlined transaction workflows to enhance customer experience.

## SKILLS

---

- **Programming:** JavaScript, ReactJS, NextJS, TypeScript, NodeJS (Express), HTML5, CSS3/Tailwind, PHP(CodeIgniter), Bootstrap
- **No-code Development:** FlutterFlow
- **AI Tools & Productivity:** Leveraging AI (ChatGPT, GitHub Copilot, Claude) to accelerate development, debugging, and problem-solving
- **Databases:** SQL, MySQL, SQL Server, Supabase, Firebase
- **Version Control:** GitHub

## EDUCATION

---

**Polytechnic University of the Philippines,**  
Bachelor of Science in Information Technology - *Cum Laude*

2019 - 2023
